CoStudy — CBQ Platform: Asset Ledger & Audit Proof

One page · Prepared 2026-11-06 · Contact: Midhun, CoStudy (costudy.in)

Who we are

CoStudy is a live CMA US prep platform (production at costudy.in) built around the exam's newest format. Since the September/October 2026 window, case-based questions (CBQs) are the only written-section format on English-language CMA exams worldwide. CoStudy's CBQ layer is fully interactive — drag-and-drop, numeric entry with tolerance, multi-select, and list tasks served through a production API — not static, PDF-style case sets.

What we operate today (all figures verifiable live)

Asset	Scale	Quality state
Active MCQ bank	**9,711 questions** (P1: 6,156 · P2: 3,555)	0 untagged · 0 duplicates · 0 scrambled rows · 100% section-mapped to ICMA CSO 2024
Live CBQ cases	**34 cases · 238 tasks**	All 12 syllabus sections covered (6+6); 7 tasks per case; 5 interactive task types
Verification pipeline	Mentor intake → verify/reject → automated screening	Every active item has a named human reviewer; per-item provenance log (prompt, draft, review, edits)
Item-quality codex	31-rule Haladyna taxonomy, automated	Catches 20/20 injected flaw classes in test; arithmetic validation on every numeric key
Production audit	Automated zero-defect drill, every Friday	Latest run: **PASS — 9,711 active rows, zero failures** (excerpt attached)

Why this matters to a partner

- **The CBQ shelf is the scarcest asset in CMA prep right now.** The deepest published catalog (Gleim) lists 75+ case-based questions; UWorld lists 28; Becker lists 26. CoStudy's 34 live cases already sit in that league — and grow every week.
- **Our content is legally clean by construction.** Original authorship against the public CSO/LOS specification, human verification on every shipped item, and a provenance ledger — no per-seat-license gray zones, no copied exam material.
- **Our quality apparatus is an API, not a promise.** Any co-branded content can be routed through the same codex, mentor queue, and Friday audit that keeps our own bank at zero defects.

What we're exploring

Structured conversations with select CMA content publishers about co-branded CBQ sets and/or licensing of our interactive CBQ delivery engine. We are not seeking to purchase per-seat course content. Indicative structures, a term-sheet skeleton, and our quality/audit standards are available under NDA.

Figures as of 2026-11-06, generated from the live production database and the Friday audit excerpt attached to this sheet. This document is a business summary for partnership discussion; it is not an offer or a binding term.
